CABINETMAKING

ABOUT

The Cabinetmaking course prepares an individual to apply technical knowledge and skills, set up and operate industrial woodworking machinery, and use such machinery to design and fabricate custom cabinets and architectural millwork. The course stresses the safe use of trade hand and power tools and machinery used in the production of millwork items. Cabinets, such as kitchen and vanities are constructed, finished, and installed as part of this program.

CAREER PATHWAYS

Cabinetmaker
Architectural Woodworker
Carpenter

REQUIREMENTS

Semester course for
Juniors and Seniors

LOCATIONS

All high schools have
access to take
Cabinetmaking
